Both Camps	9:00 – 12:30 pm	

Whole Body Listening!

Larry wants to remind you to listen with your entire body

-  Eyes = Looking toward the speaker
-  Ears = Both ears ready to hear
-  Mouth = Quiet - waiting for your turn to talk
-  Hands = Quiet and kept to yourself
-  Feet = Quiet and still
-  Body = Facing toward the speaker
-  Brain = Thinking about what is being said
-  Heart = Consider the speaker and others listening

SUMMER INTENSIVES

Intensive Individual Therapy

(Ages 3 years and above)

Occupational Therapy intensives consist of one individual 60-minute session for five consecutive days. Intensives offer an opportunity for your child to gain skills more rapidly than during a typical treatment program. One week of intensive therapy is the equivalent of two and a half months of a typical, weekly therapy program.

Help your child get a boost in skills before the next school year begins! Your child will engage in a variety of treatment strategies, including: Interactive Metronome, therapeutic auditory programs, visual-vestibular activities, and many more sensory-integrative strategies!

Your child's program will be developed to meet his specific needs and will work toward his specific goals. Results of an intensive therapy program may include improvement in the following areas:

- Attention
- Self-Regulation
- Handwriting Skills
- Motor Coordination
- Core Strength
- And more!
